1. INTRODUCTION

Prior Capital CY Ltd (former PriorFX Ltd) (hereafter the “Company”) is an Investment Firm authorized and regulated by the Cyprus Securities and Exchange Commission (hereafter the “CySEC”) under the License No. CIF221/13. The Company is incorporated and registered under the laws of the Republic of Cyprus under the certificate registration number HE321360. The head office of the Company is located at 196 Arch. Makarios III Ave., Ariel Corner, 3030 Limassol, Cyprus.

In accordance with Markets in Financial Instruments Directive II (MiFID II) 2014/65/EU and the Investment Services and Activities and Regulated Markets Law of 2017 (Law 87(I)/2017) as amended the Company is required to provide its Clients and potential Clients with its Order Execution Policy (hereinafter referred to as the “Policy”). This Policy provides the procedures and methods the Company applies to ensure the prompt, fair and expeditious execution with best trade execution condition for their Clients, taking into account price, costs, speed, likelihood of execution, size, nature or any other consideration relevant to the execution of the order.

Upon acceptance of a Client order for securities listed on regulated markets and outside, the Company will endeavor to execute that order in accordance with the following Policy, unless otherwise instructed by the Client in respect to order execution.

This Policy forms part of the Client’s agreement with the Company and therefore, by entering into an agreement with the Company, you are also agreeing to the terms of this Policy, as set out in this document.

NOTE: For you benefit and protection, please ensure you take sufficient time to read the Policy and any other additional documentation and information available to you via our official website, prior to opening an account and/or carrying out any activity with us. You should contact us for any further clarification or seek independent professional advice (if necessary).

2. SCOPE

This Order Execution Policy applies both to Retail and Professional Clients when executing transactions for the financial instruments provided by the Company. If the Client decides to open a position in a financial instrument with the Company, then that open position can only be closed with the Company. The Company does not guarantee that when executing a transaction, the Client’s price will be more favorable than one which can be obtained elsewhere.

The classification of Retail and Professional Clients is derived from Article 4 of MiFID II:

- ‘Client’ means any natural or legal person to whom an investment firm provides investment or ancillary services;
- ‘Professional Client’ means a client meeting the criteria laid down in Annex II;
- ‘Retail Client’ means a client who is not a Professional Client;

2A. Exemptions from Best Execution

The Company does not undertake to provide “Best Execution” if you are classified as an Eligible Counterparty.

Subject to MiFID II Article 30 (1), which stipulates that the best execution obligation under Article 27 does not apply to Eligible Counterparties. Prior Capital CY Ltd ascertains that Eligible Counterparties have full knowledge and understanding of MiFID II and the corresponding national legislation.

This Policy applies when the Company executes Client's orders provided that the following criteria are satisfied:

- The Client is dealing in financial instruments covered by Company's license;
- The financial instruments provided by the Company are derivatives of an underlying financial instrument, and it is up to the Company's discretion to decide which types of financial instruments to make available and to publish the prices at which these can be traded;
- Specific instructions given by the Client do not prevent the Company from providing to the Client this Policy;
- The Company did not provide the Client with direct market access through an electronic interface which links only to a particular execution venue.

2B. Execution Venues

Prior Capital CY Ltd may execute transactions in all financial instruments allowed (please see **Paragraph 3**) outside regulated markets or MTFs, within the framework of Over the Counter ("OTC") deals with financial institutions and other counterparties, that have the right to enter into such transactions. In such occasions, Prior Capital and its counterparty with which the Company shall negotiate the specific transaction would remain the sole execution venue. In all cases Prior Capital undertakes to follow the Company's best execution requirements within the pool of reliable counterparties available to us at the specific time.

3. PROVISION OF SERVICES

The Investment Services to be provided by the Company to the Client are:

- Execution of Orders on Behalf of Clients;
- Reception and transmission of orders in relation to one or more financial instruments;
- Dealing on Own Account;
- Portfolio Management;
- Provision of investment advice.

The Ancillary Services to be provided by the Company to the Client are:

- Safekeeping and administration of financial instruments, including custodianship and related services;
- Granting credits or loans to one or more financial instruments, where the firm granting the credit or loan is involved in the transaction;
- Advice to undertakings on capital structure, industrial strategy and related matters and advice and services relating to mergers and the purchase of undertakings;
- Foreign exchange services where these are connected to the provision of investment services;
- Investment research and financial analysis or other forms.

The Company shall be offering the above investment services, in respect of the following financial instruments:

- (1) Transferable securities;
- (2) Money-market instruments;
- (3) Units in collective investment undertakings;

- (4) Options, futures, swaps, forward rate agreements and any other derivative contracts relating to securities, currencies, interest rates or yields, emission allowances or other derivatives instruments, financial indices or financial measures which may be settled physically or in cash;
- (5) Options, futures, swaps, forwards and any other derivative contracts relating to commodities that must be settled in cash or may be settled in cash at the option of one of the parties other than by reason of default or other termination event;
- (6) Options, futures, swaps, and any other derivative contract relating to commodities that can be physically settled provided that they are traded on a regulated market, a MTF, or an OTF, except for wholesale energy products traded on an OTF that must be physically settled;
- (7) Options, futures, swaps, forwards and any other derivative contracts relating to commodities, that can be physically settled not otherwise mentioned in point 6 of this Section and not being for commercial purposes, which have the characteristics of other derivative financial instruments;
- (8) Derivative instruments for the transfer of credit risk;
- (9) Financial contracts for differences;
- (10) Options, futures, swaps, forward rate agreements and any other derivative contracts relating to climatic variables, freight rates or inflation rates or other official economic statistics that must be settled in cash or may be settled in cash at the option of one of the parties other than by reason of default or other termination event, as well as any other derivative contracts relating to assets, rights, obligations, indices and measures not otherwise mentioned in this Section, which have the characteristics of other derivative financial instruments, having regard to whether, inter alia, they are traded on a regulated market, OTF, or an MTF;

The Company is authorised to provide services on CFDs on cryptocurrencies and has been given permission to provide services on cryptocurrencies as a form of any other business.

Attention: Cryptocurrencies and CFDs on Cryptocurrencies are an extremely volatile high-risk, speculative investment and you may experience a significant loss over a short-period of time or lose all your invested capital. They are not appropriate for all investors. Before trading, you need to ensure you fully understand the risks involved taking into consideration your level of experience and investment objectives. Seek independent advice and consultation from an independent financial advisor if you have any doubts.

The Company lists on its website the transactions that the Client can conclude with the Company and the financial instruments that the Client can buy or sell. The Company reserves the right to amend the transactions and the financial instruments concerned without prior notice.

4. DEFINITIONS

For the purposes of this Policy, the following words and expressions shall have the meaning set out next to them:

“**Financial Instruments**”, all instruments permitted by the license mentioned in Paragraph 3.

“**Order**”, when used hereinafter, unless the context requires otherwise, shall mean an instruction to buy or sell a financial instrument which is accepted by the Company.

“**Execution Venue**”, includes a regulated market (“RM”), a multilateral trading facility (“MTF”), an organized trading facility (“OTF”), a systematic internaliser (“SI”), or a market maker or other liquidity provider or an entity that performs a similar function in a third country to the functions performed by any of the foregoing.

“**Execution Factors**”, when used hereinafter, unless the context requires otherwise, shall mean those factors listed in Paragraph 7 of this Policy.

“**Execution Criteria**”, when used hereinafter, unless the context requires otherwise, shall mean those factors listed in Paragraph 13 of this Policy.

“**Eligible Counterparties**”: are defined as Investment Firms, credit institutions, insurance companies, UCITS and their management companies, pension funds and their management companies, other financial institutions authorised or regulated under Union law or under the national law of Member State, national governments and their corresponding offices including public bodies that deal with public debt at national level, central banks and supranational organisations.

“**MiFID II**” means Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU including any applicable amending and/or supplementing directive and/or regulation.

“**Multilateral Trading Facility (MTF)**”, when used hereinafter, unless the context requires otherwise, shall mean a multilateral system, operated by an investment firm or a market operator, which brings together multiple third party buying and selling interest in financial instruments and in a way, that results in a contract in accordance with MiFID II.

“**Organized Trading Facility (OTF)**” means a multilateral system which is not a regulated market or an MTF and in which multiple third-party buying and selling interests in bonds, structured finance products, emission allowances or derivatives are able to interact in the system in a way that results in a contract in accordance with Title II of MiFID II.

“**Over the Counter (OTC)**”: Non-regulated manner in which financial instruments are traded directly between two parties. The markets, for any kind of asset are a combination of non-regulated and regulated exchange.

“**Policy**” means this Order Execution Policy in accordance with MiFID II.

“**Regulated Market (RM)**” means a multi-lateral system operated and/or managed by a market operator, which facilitates the bringing together of multiple third-party buying and selling interests in financial instruments – in the system and in accordance with its non-discretionary rules – in a way that results in a contract, in respect of the financial instruments admitted to trading under its rules and/or systems, and which is authorised and functions regularly as defined and in accordance with the provisions of MiFID II.

“**Specific instructions**” means a specific instruction by a Client as to how the order should be executed, including specifying price limit, execution time, broker or venue to be used, or other parameter.

“**Systematic Internaliser (SI)**” means an investment firm which, on an organized, frequent, systematic and substantial basis, deals on own account by executing client orders outside a RM, a MTF, an OTF, without operating a multilateral system.

5. ORDER EXECUTION ELEMENTS

STP Model: The Company acts as basically market-risk-less intermediary broker or equivalently principal, and in accordance with MiFID II matched principal. The Company is instantly setting-off all market risk from each Client’s contract effected using a Straight-Through Processing (STP) bridge with counterparties

where each Client deal is set-off.

Price of financial instruments: The Company receives price feeds from some of the world's leading liquidity providers. Having multiple liquidity providers is important especially during abnormal market conditions, such as times of extreme volatility. Under these conditions and even if a certain number of liquidity providers decide to widen the spreads or stop quoting prices at all, the Company is still able to provide Clients with competitive prices which for MetraTrader 4 include Prior Capital's mark-up. The remaining liquidity providers shall continue competing to provide Prior Capital the best 'bid' and 'ask' prices.

Re-quoting: this is the practice of providing a secondary quote to the Client after an 'instant order' has been submitted; the Client must agree to this quote before the order is executed. Prior Capital will re-quote 'instant orders' if the requested price originally specified by the Client is not available. The secondary quote provided to the Client is the next available price received by Prior Capital from its third party liquidity providers. Prior Capital does not re-quote 'pending orders'.

Slippage: at the time that an order is presented for execution, the specific price requested by the Client may not be available; therefore, the order will be executed close to or a number of pips away from the Client's requested price. If the execution price is better than the price requested by the Client this is referred to as 'positive slippage'. In contrast, if the execution price is worse than the price requested by the Client this is referred to as 'negative slippage'. Please be advised that 'slippage' is a normal market practice and a regular feature of the foreign exchange and stock markets under conditions such as illiquidity and volatility due to news announcements, economic events and market openings. Prior Capital's automated execution software does not operate based on any individual parameters related to the execution of orders through any specific Client accounts.

Price Adjustment: a market-driven phenomenon reflecting the difference between the price requested by the trader and the price verified by the liquidity providers that affects the large tickets executed on multiple levels in the Depth of Market. Thus, the larger is the ticket, the higher the probability for an unfavorable price adjustment, meaning that large orders can be more expensive to execute than smaller orders.

Partial fills: this is the practice of executing an order in parts if there is not enough liquidity in the market at the time in order to fill-in the full order at a specific price. Partial fills may be executed at different prices.

Cost: for opening a position in some types of financial instruments the Client may be required to pay commission or financial fees, if applicable, the amount of which is disclosed on the Company's website.

Commissions: commissions may be charged either in the form of a percentage of the overall value of the trade or as fixed amount. For more information please see our commissions at <https://priorfx.com/en/accounts/trading-conditions/>.

Additionally, Clients can view all Commissions and Fees history electronically from Company's Interface directly through Clients' personal area.

In order to assess and compare the results for the Client that would be achieved by executing the order on each of the execution venues listed in the investment firm's order execution policy that is capable of executing that order, the Company's own commissions and the costs for executing the order on each of the eligible execution venue should be taken into account.

Financing Fee: in the case of financing fees, the value of opened positions in some types of financial instruments is increased or reduced by a daily financing fee "Swap" throughout the life of the contract. Financing fees are based on prevailing market interest rates, which may vary over time. Details of daily financing fees applied are available under Trading Conditions section at <https://priorfx.com/en/accounts/trading-conditions/>. For all types of financial instruments that the Company offers, the commission and financing fees are not incorporated into the Company's quoted price and are instead charged explicitly to the Client account.

Additionally, Clients can view all Commissions and Fees history electronically from Company's Interface directly through Clients' personal area.

Currency Conversion: The Company may provide a currency conversion quote from the Client's base currency to the currency of the relevant financial instrument. This will not reflect an actual conversion of currency in the Client's account, and serves the purpose of calculating consideration in the base currency only.

Mark-up: Clients shall be charged a mark-up on spread when trading CFDs on forex, metals, oil, equities, indices and futures through MT4. Further information can be found available in our website.

6. ORDER TYPE EXECUTION

The Client can place with the Company the following types of orders:

- a. **Instant Order:** this is an order to either buy or sell at the 'Ask' or 'Bid' price (respectively) as it appears in the quotes flow at the time the Client presents the order for execution.
- b. **Pending Order:** a pending order is an order to buy or sell a financial instrument in the future once a certain price specified by the Client is reached. The Company offers four types of pending orders. **Buy Limit, Buy Stop, Sell Limit and Sell Stop.** Stop loss and/or take profit limits can be attached to this type of order. The Client may modify an order before executed but has no right to modify or remove 'Stop Loss', 'Take Profit' and 'Pending Order' orders if the price has reached the level of the order execution and orders have been transmitted automatically fully (in respect to current liquidity) by system for execution.
- c. **Pending Order Modification/Cancellation:** the Client may modify/cancel a 'Pending Order' if the market did not reach the level of the price specified by the Client and order has not been transmitted automatically fully (in respect to current liquidity) by system for execution.
- d. **Good 'til Cancelled ('GTC') (= Expiry):** this is an execution setting that the Client may apply to 'Pending Orders'. The order may remain 'live' and pending for execution until such time as the order is triggered and treated as a market order or cancelled by the Client.
- e. **Stop Order:** this is an order to buy or sell once the market reaches the 'Stop Price'. Once the market reaches the 'stop price' the 'stop order' is triggered and treated as a 'market order'. If the 'stop order' is not triggered it shall remain in the system until a later date subject to the conditions described in the 'Good 'til Cancelled' section.
- f. **Stop Loss:** this is an order to minimise losses. Once the market reaches the 'stop loss price' the order is triggered and treated as a 'market order'. If the 'stop loss' is not triggered it shall remain in the system until a later date.
- g. **Take Profit:** this is an order to secure profits. Once the market reaches the 'take profit price' the order is triggered and treated as a 'limit order'. If the 'take profit' is not triggered it shall remain in the system until a later date. For CFDs on FX, spot metals, equities and indices, 'take profit' orders should be placed a minimum number of pips away from the current market price in order for these to be valid. 'Take Profit' orders placed within the current bid-ask spread will be automatically removed.
- h. **Market Order:** this is an order to buy or sell at the best available price at the time of the execution.

7. BEST EXECUTION FACTORS

In general, all Client orders will be executed in accordance with the time of their reception. All sufficient steps will be taken in order to obtain, when executing orders, the best possible result for Clients taking into consideration a range of different factors as required by MiFID II and the relevant local legislation. These data are provided to Clients on ex-ante basis.

Company's price: When acting as a market maker the Company calculates and provides its own tradable prices for a given CFD by reference to the prices of the relevant underlying asset, which the Company obtains from third party reputable external reference sources (i.e. price feeders). When acting as a straight through processing broker, the Company's price for a given financial instrument is calculated by reference to the price of the relevant underlying financial instrument, which the Company obtains from third party reputable external reference sources (upper brokers). The Company's prices can be found on the Company's trading platform(s) and/or website. The Company updates its prices as frequently as the limitations of technology and communications links allow. The Company reviews its used third party external reference sources at least once a year, to ensure that the data obtained continue to be competitive. The Company will not quote any price outside Company's operations time (see Execution Venue below), therefore no Orders can be placed by the Client during that time.

Bid – Ask Spread: For any given financial instrument, the Firm will quote two prices: the higher price (ASK) at which the Client can buy (go long) that financial instrument, and the lower price (BID) at which the Client can sell (go short) that financial instrument; collectively referred to as the Company's prices. The difference between the lower and the higher price of a given financial instrument is the spread which includes The Company's mark-up.

Pending Orders: Such orders as Buy Limit, Buy Stop and Stop Loss/Take profit for opened short position are executed at ASK price. Such orders as Sell Limit, Sell Stop and Stop Loss/Take profit for opened long position are executed at BID price.

The Company's price for a given financial instrument is calculated by referencing the price of the relevant underlying financial instrument and/or asset, which the Company obtains from third party liquidity providers. The Firm updates its prices as frequently as the limitations of technology and communications links allow. The Company will not quote any price outside Company's operations time (see execution venue below) therefore no orders can be placed by the Client during that time.

For the platform, trades prices are obtained directly from the liquidity providers through an electronic execution system. This system automatically requests a quote from a selection of liquidity providers. In conjunction with the price, the Company quotes the available liquidity, (or 'market depth'), as obtained from its third-party liquidity providers. The Company's software will automatically aggregate all available liquidity at the best possible prices available and fill at the Volume-Weighted Average Price (V.W.A.P.).

8. SPEED AND LIKELIHOOD OF EXECUTION

The Client acknowledges that the transactions entered into with the Company in Foreign Exchange and Financial Contracts for Difference are undertaken through the Electronic Trading Platform of the Company. The Orders will be executed on an 'over the counter' basis rather than on a regulated market or a Multilateral Trading Facility. Such Orders are automatically routed to an Execution Venue which the Company has assessed to be the best execution. The Company places a significant importance when executing Client's

Orders and strives to offer high speed of execution within the limitations of technology and communications links.

If the Client undertakes transactions on an electronic system, like the Company's Electronic Trading Platform, he/she will be exposed to risks associated with the system including the failure of hardware and software (Internet/Servers). The result of any system failure may be that the Client's Order is either not executed according to the Client's instructions or it is not executed at all. The Company does not accept any liability in the case of such a failure. The use of wireless connection or dial-up connection or any other form of unstable connection at the Client's end, may result in poor or interrupted connectivity or lack of signal strength causing delays in the transmission of data between the Client and the Company when using the Company's Electronic Trading Platform. This delay may result in sending to the Company out of date "Market Orders".

In this case the Company will update the price and execute the order at the market price available. The Client may request the Company to execute upon receipt instructions conveyed by telephone, e-mail or any other written or oral means of communication that each of the present and future account holders, attorneys and duly authorized representatives shall give individually to the Company, even if these instructions are not followed by a confirmation in writing. The Company does not accept any liability in case of misunderstanding, error in the identification of the person giving the instruction or other errors on its part related to such method of communication and which may involve losses or other inconveniences for the Client. The Company reserves the right not to execute instructions transmitted by telephone. Telephone conversations may be recorded, and you will accept such recordings as conclusive and binding evidence of the instructions.

The Company seeks to execute all Orders placed by its Clients.

9. ORDERS

The Client requests a quotation at the price that is stated on the Company's Electronic Trading Platform. However, due to the high volatility of the market, prices may change before a Client can execute Orders at their determined price. The Company at this point, has the right to offer the Client a new price. The Client can either accept the new price and execute the Order, or refuse the new price, cancelling the Order transaction completely.

Orders can only be placed, executed, modified or closed within the trading time and shall remain effective through to the next trading session. The Client's Order shall be valid according to the type and time of the given Order. If the time of validity of the Order is not specified, it shall be valid indefinitely.

Order status is always shown on the Company's Electronic Trading Platform and can be accessed via the Client's online trading terminal. Should access to the Company's Electronic Trading Platform not be possible, Clients may contact the Company by telephone and request the status of any of their pending Orders.

Stop Loss, Take Profit, Buy Limit, Buy Stop, Sell Limit, Sell Stop Orders on financial instrument contracts are executed at the declared by the Client price on the first current price touch. But under certain trading conditions it may be impossible to execute Orders (Stop Loss, Take Profit, Buy Limit, Buy Stop, Sell Limit, and Sell Stop) on any financial instrument contract at the declared price. In this case the Company has the right to execute the Order at the first available price. This may occur, for example, at the following cases:

- Trading Session start moments;
- During news times;
- During volatile markets where prices may move significantly up or down and away from declared price;
- Where there is rapid price movement, if the price rises or falls in one trading session to such an extent that under the rules of the relevant exchange, trading is suspended or restricted;
- If there is insufficient liquidity for the execution of the specific volume at the declared price.

The Company strives to provide the best possible price to its Clients and makes every effort and necessary arrangements to do so; however, it may be impossible to guarantee the execution of any or all the Pending Orders at the declared price. The minimum level for placing Stop Loss, Take Profit, Buy Limit, Buy Stop, Sell Limit and Sell Stop Orders is between 1 to 5 times the spread for a given financial instrument.

10. SIZE OF ORDER

The minimum size of an Order is 0.01 lots. A lot is a unit measuring the transaction amount and it is different for each type of financial instrument. Please refer to the Spreads and Conditions section on the Company's website for the value of each lot for a given financial instrument type. The Company reserves the right to decline an Order as explained in the terms and conditions entered with the Client. The Company makes every effort to fill the Order of the Client irrespective of the volume. However, if this is achieved, it may be at a best available price, different from declared price, as the market liquidity may allow at the time of execution. (See above, Speed and Likelihood of Execution).

11. MARKET IMPACT

Some factors may affect rapidly the price of the underlying financial instruments from which the quoted Company price for its financial instruments is derived. These factors may influence some of the factors listed above. The Company will take all sufficient steps to obtain the best possible result for its Clients.

The Company does not consider the above list exhaustive and the order in which the above factors are presented shall not be taken as priority factor. Nevertheless, whenever there is a specific instruction from the Client the Company shall make sure that the Client's Order shall be executed following the specific instruction.

12. EXECUTION VENUES

Execution Venues are the entities with which the Client's Orders are placed. The Company is the sole Execution Venue for the execution of the Client's orders.

The Client acknowledges that the transactions entered with the Company in all financial instruments allowed (please see **Paragraph 3**) are undertaken through the electronic trading platform(s) of the Company. The Orders will be executed on an '*over the counter*' basis rather than on a regulated market or a Multilateral Trading Facility. Such Orders are automatically routed to an execution venue which the Company has assessed to be the best execution. The Company places a significant importance when executing Client's Orders and strives to offer high speed of execution within the limitations of technology and communication links.

The Company regularly assesses the execution venues available in respect of any products that the Company

provides to its Clients to identify those that will enable the Company, on a consistent basis, to obtain the best possible result to their Clients.

Where there is more than one available execution venue for the execution of an order, the commissions and costs of the Company on each of the eligible execution venues shall be taken into account when assessing and comparing the results for the Client that would be achieved by executing the order on each of the eligible execution venues.

The Company will take sufficient measures to ensure that it will not be receiving any remuneration, discount or non-monetary benefit for routing Client orders to a particular trading venue or execution venue, without the consideration of the above factors, which might potentially infringe the requirements in relation to best execution, conflicts of interest or inducements.

The Company places significant reliance to the above execution venue based on the above mentioned factors and their relevant importance. It is the Company's policy to maintain such internal procedures and principles in Order to act for the best interest of its Clients and provide them the best possible result (or '*best execution*') when dealing with them.

The Client acknowledges that the transactions entered in financial instruments with the Company are not undertaken on a recognized exchange, rather they are undertaken through the Company's electronic trading platform and, accordingly, they may expose the Client to greater risks than regulated exchange transactions. Therefore, the Company may not execute an Order, or it may change the opening (closing) price of an Order in case of any technical failure of the Company's electronic trading platform or quote feeds.

While the Company strives to execute all orders placed by its Clients, it reserves the right to decline an order of any type or execute the order at the first available market price. In case of technical failure of the trading platform or quote feeds, the Company may change the opening/closing price of an order.

Under certain market conditions such as a fast moving market or low liquidity, the Company reserves the right to modify the spread of the transactions. In certain circumstances such as unusual market conditions, fundamental market announcements (news) or the size and nature of the Client's order, it may be wholly or partly manually priced, and then have an impact on the price at which the order is executed.

It should be noted that the price at which a trade is executed may vary significantly from the original requested price during abnormal market conditions. This may occur, for example, in the following cases:

- (1) During Market opening.
- (2) During news times.
- (3) During volatile markets where prices may move significantly away from the declared price.
- (4) Where there is rapid price movement - if the price rises or falls in one trading session to such an extent that under the rules of the relevant exchange, trading is suspended or restricted.
- (5) If there is insufficient liquidity for the execution of the specific volume at the declared price.

Clients are required to close open positions in regard to any given financial instrument during the operating hours of the Company's electronic trading platform.

The operating hours of the Company's electronic trading platform are as follows:

- **Working periods:** round – the – clock from 00.00.01 A.M. Cyprus Time (GMT +2) Monday through 00.00.00 P.M. Cyprus Time (GMT +2) Friday.
- **Non-working periods:** from 00.00.01 A.M. Cyprus Time (GMT +2) Saturday through

00.00.00 P.M. Cyprus Time (GMT +2) Sunday.

- **Holidays:** Holidays will be announced through the internal mail or other meaning of communication.

13. EXECUTION CRITERIA

The Company will determine the relative importance of the above factors, as these are defined in Part VI, Paragraph 23, Directive DI144-2007-02 of 2012, by using its commercial judgment and experience in the light of the information available on the market and taking into account the criteria described below:

- a. the characteristics of the Client including the categorization of the Client as retail or professional;
- b. the characteristics of the Client Order;
- c. the characteristics of financial instruments that are the subject of that Order;
- d. the characteristics of the execution venues to which that Order can be directed.

For retail Clients, the best possible result shall be determined in terms of the total consideration, representing the price of the financial instruments and the costs related to execution, which shall include all expenses incurred by the Client which are directly related to the execution of the Order, including execution venue fees, clearing and settlement fees and any other fees paid to third parties involved in the execution of the Order.

The Company is able to demonstrate to its Clients, at their request, that we have executed their orders in accordance with the Company's Order Execution Policy.

14. OTHER RELEVANT FACTORS

The Company will take all sufficient steps to obtain the best possible result for its Clients but during times of high demand execution may cause delays in processing an order which in turn can have an impact on the price and speed at which the order is executed. Furthermore, in the case of any communication or technical failure, as well as any incorrect reflection on the quotes feed, the Company reserves the right not to execute an order or change the opening and/or closing price of a particular order.

The Company considers, but without the list being exhaustive, as relevant factors that might affect the execution of Clients orders, fundamental announcements and unusual market conditions such as low liquidity or/and high volatility.

The Company does not consider the above-mentioned factors to be exhaustive and the order in which the above factors are presented do not reflect any prioritization. However, in some cases, Retail Clients will be prioritised on the basis of total consideration, in other cases, the Company should make a determination of the relevant priorities for the various execution factors.

15. SPECIFIC INSTRUCTIONS

Where the Client provides the Company with a specific instruction in relation to his/her order or any part of it, including selection of Execution Venues, the Company will execute that order in accordance with those specific instructions and, in doing so, it will have complied with its obligations to provide the best possible results to the extent that those instructions are followed. In compliance with ESMA's technical guidance, our Company will not induce Clients to give the instruction to execute on order in a particular way, by expressly indicating or implicitly suggesting the content of the instruction to the Client, in cases where we are reasonably expected to know that an instruction to that effect is likely to prevent it from obtaining the best

possible result for that Client.

Nevertheless, when executing an order following a specific Client instruction, the Company will execute the order in line with those instructions and will consider that it has discharged its best execution obligations. This may result in being unable to follow the Company's order execution policy for that particular order. In this instance, the Company will follow its Order Execution Policy for those parts or aspects of the order not covered by the Client's instructions.

16. IMPORTANT INFORMATION

Specific Leverage Limits are applying for Retail Clients. These new rules are designed to offer further protection to retail traders.

Subject to ESMA's decision (EU) 2018/796 of 22 May 2018 to temporarily restrict Contracts for Differences in the Union in accordance with Article 40 of Regulation (EU) No 600/2014 of the European Parliament and of the Council, implements the following measures which supersede any other section in this Order Execution Policy regarding to leverage as long as the measures are in effect:

16.1. Leverage Limits when you open a position which will vary according to the volatility of the underlying asset:

- a. 3,33% of the notional value of the CFD when the underlying currency pair is composed of any two of the following currencies: US Dollar, Euro, Japanese Yen, Pound Sterling, Canadian Dollar or Swiss Franc; (30:1 for major currency pairs);
- b. 5% of the notional value of the CFD when the underlying index, currency pair or commodity is: (20:1 for non-major currency pairs, gold and major indices):
 - i. any of the following equity indices: Financial Times Stock Exchange 100 (FTSE 100); Cotation Assistee en Continu 40 (CAC 40); Deutsche Bourse AG German Stock Index 30 (DAX30); Dow Jones Industrial Average (DJIA); Standard & Poors 500 (S&P 500); NASDAQ Composite Index;
 - ii. a currency Pair composed of at least one currency that is not listed in point (a) above;
 - iii. or Gold;
- c. 10% of the notional value of the CFD when the underlying commodity or equity index is a commodity or any equity index other than those listed in point (b) above; (10:1 for commodities other than Gold and non-major equity indices)
- d. 50% of the notional value of the CFD when the underlying is a cryptocurrency (2:1 for cryptocurrencies) or;
- e. 20% of the notional value of the CFD when the underlying is: (5:1 for individual equities and other reference values)
 - i. a share;
 - ii. or not otherwise listed above

Retail Clients are not required to post additional margin for existing CFD positions (opened before 1st August 2018) to meet the initial margin protection requirement under Article 1(d) and Annex I of Decision 2018/796. Margin close out requirement will be implemented as section 2 below.

16.2. Margin close out rule: Your open CFD's positions will automatically be closed out if the margin reaches 50% of its initial value (margin close-out rule per account basis at 50% of the total initial margin protection). The value of your account shall not fall lower than 50% of the total initial margin protection that was paid to enter into all currently open CFDs at any point in time.

In the event you have set up a Stop Loss that will be exceeding the maximum loss allowed under the Margin closeout rule, the trade will be closed accordingly to the Margin closeout rule.

For example, if you invest 500 USD and set a Stop Loss option at 300 USD, the position will be closed at 250 USD due to the ESMA Regulation;

16.3. Negative Balance Protection: This will provide you an overall guaranteed limit for CFDs losses. This ensures to you that your maximum losses from trading CFDs including all related costs, are limited to the total funds related to trading CFDs that are your funds in your CFD trading account. In the event that a position closed at such price causing the Equity Balance of your trading account to fall below zero, the Company's Liquidity provider shall waive its rights to receive the balance from the Company and to receive the balance from you.

16.4. Restriction on the incentives that you offered to trade CFDs: The Company does not offer any bonuses or other trading benefits; and

16.5. Standardized risk warning: The Company replaced its existing risk warning with the standardized risk warnings required by the ESMA's Product Intervention Measures.

CFDs are not eligible for sale in certain jurisdictions or countries. The Policy is not directed to any jurisdiction or country where its publication, availability or distribution would be contrary to local laws or regulations, including the United States of America. The Policy does not constitute an offer, invitation or solicitation to buy or sell CFDs. It may not be reproduced or disclosed (in whole or in part) to any other person without prior written permission. The Policy is not intended to constitute the sole basis for the evaluation of the Client's decision to trade in Contracts for Difference (CFDs).

17. REPORTING OBLIGATIONS

Based on the changes introduced by MiFID II and Markets in Financial Instruments Regulation (MiFIR) we are obliged to report financial instruments subject to the trading obligation in Articles 23 and 28 MiFIR, each trading venue and Systemic internaliser, and for other financial instruments, each execution venue, must make available to the public, without any charges, data relating to the quality of execution of transactions on that venue on a quarterly basis.

Further to MiFID II standards RTS27 and RTS28, the Company ensure that will provide its Clients with an ongoing view of the execution they are receiving in the market place. RTS27 requires execution venues, market makers and systemic internalisers to publish reports with their transaction data. These reports must be published on a quarterly basis and include data for each trading day. On the other side, RTS28 requires investment firms to publish annual information every year (End of April), in a summary form of the quality of execution and disclosure of their top 5 (five) execution venues. In due circumstances, the Company's Execution Quality Summary Statement ("EQSS") RTS28 and RTS27 can be found online at Company's [website](#).

- Investment firms who execute Client orders must summarise and make public on an annual basis, for each class of financial instrument, the top five execution venues in terms of trading volumes where they executed Client orders in the preceding year and information on the quality of execution obtained.
- In cases where the firm provides both the services of order execution and transmission of orders, the firm will prepare two separate reports in relation to these services.

Reporting data for non-securities financing transactions

- Volume of Client orders as percentage of executed orders;
- Percentage of the executed orders that were passive, aggressive and directed;

- Confirmation whether a firm has executed an average of less than one trade per business day in the previous year in a given class of financial instruments.

Reporting data for securities financing transactions

- Volume and number of Client orders executed as a percentage of total executed orders;
- Confirmation whether a firm has executed an average of less than one trade per business day in the previous year in a given class of financial instruments.

Summary analysis per class of financial instruments

- Relative importance of execution factors (price, cost, speed, likelihood of execution) or any others
- A description of close links, conflicts of interests, common ownership
- A description of payments, discounts, rebates or non-monetary benefits received
- An explanation of changes on the list of venues in the policy, if applicable
- An explanation of how order execution differs according to Client categorisation
- An explanation of whether other criteria were given precedence over immediate price and cost when executing retail orders
- An explanation of how the investment firm has used any data or tools relating to the quality of execution

18. CLIENT'S PRIOR CONSENT

When establishing a business relation with the Client for our investment services (subject to MiFID II), the Company is required to obtain the Client's prior consent to this Policy. The Company may obtain the above consents in the form of a general agreement. There may be occasions when achieving the best possible result in carrying out a Client order will require executing the order outside Trading Venues. Clients consent to us acting under discretion in such circumstances by providing express consent in the form of a general agreement. This only applies to Client orders in financial instruments admitted to trading on a Trading Venue. The Company may obtain the above consents in the form of a general agreement.

The Company reserves the right to review and/or amend its Policy and arrangements, at its sole discretion, whenever it deems fit or appropriate.

Our Order Execution Policy is part of our Terms and Conditions of Business, which is a contractually binding agreement between the Company and its Clients, and is incorporated therein by reference. It shall be applicable to all transactions among the Company and its Clients, to the extent that it does not impose and/or does not seek to impose any obligations on us which we would not otherwise have, but for the Cyprus Investment Services and Activities and Regulated Markets Law of 2017 (Law 87(I)/2017).

19. MONITORING AND REVIEW

We have procedures and processes in place to analyze the quality of execution, as well as to monitor best execution. We measure and monitor the competitiveness of our prices against other major competitors and the speed of our execution. We also monitor the symmetry of slippage and requotes.

The Company will review and monitor the effectiveness of this Order Execution Policy and arrangements to identify and, where appropriate, correct any deficiencies. It will assess, at least annually, whether the execution venues included in this Order Execution Policy enable the Company to provide the best possible result for the Client's orders and whether it needs to make changes to its execution arrangements.

Prior Capital's Compliance department and internal audit perform additional independent reviews of the above processes and provide assurance as to their effectiveness. These reviews and assessments are conducted on a regular basis and at least annually. Where necessary, they provide recommendations for improvements, which are then implemented with the aim of keeping the quality of execution to the highest standards possible.

Furthermore a review will also be carried out whenever a material change occurs that affects the ability of the Company to continue to obtain the best possible result for the execution of its Client orders on a consistent basis using the venues included in this Order Execution Policy. The Company will not notify its Clients individually of changes, other than substantial material changes to this Order Execution Policy and therefore the Client should refer from time to time to the Company website where the latest and most up to date Execution Policy will be available.

20. FAQ

Questions regarding the Policy should be addressed, in the first instance, to the Customer Support Department. Customer Support e-mail: support@priorcapital.eu
